

OTRONIA

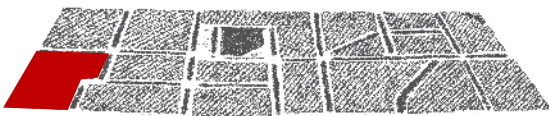

PATAGONIA EXTREMA

LAGUNAR NARANJO 2021

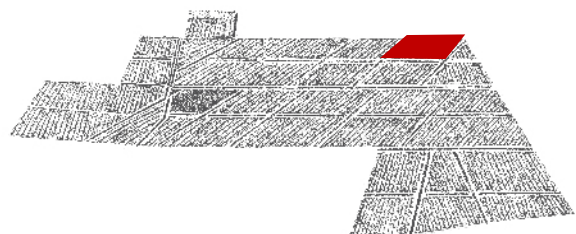

The grapes come from a plot in our Sierra Silva vineyard, defined by a typical soil of fluvial origin, composed of a matrix of small spherical pebbles of low granulometry (1 to 3 cm), arranged on a sandy-clay system. Fermented with de-stemmed grapes in a 3000-liter concrete egg, macerated with their skins for 30 days in order to enhance aromas, textures and as a side effect the coppery orange tone.

PAICO VINEYARD · LOT 1
