LAGUNAR TORRONTÉS 2021

Lagunar is inspired by a geological era in which the terroir that today makes up our estate was covered by the waters of the ancient Sarmiento Paleolake. Today, this place produces exceptional wines, marked by their origin, history and soils, which have a texture determined by the materials at the bottom of the lake, the plot from which these grapes come from has soils of eolian sands, lagoon clays and fluvial stones. The grapes are harvested by hand and pressed without destemming. A static cold racking is carried out and fermentation is spontaneous. The wine is then aged in concrete eggs for 12 months.
